

Equine Chelamin™

A naturally chelated organic trace mineral complex containing over 74 trace minerals exactly as they are found in nature.

Over time, with intensive farming practices, soils from which feeds are derived have been dangerously depleted of trace minerals. Nitrogen, phosphorous, and potassium (NPK) fertilizers do not restore many important trace minerals necessary for health. Equine Chelamin is a comprehensive source of vitally important trace minerals as they occur in nature. Its trace minerals are in various combinations with each other and are in chelated (combined) relationships with organic molecules. Mineral chelates are the form minerals take in natural foods – the form that best facilitates mineral absorption into body tissues. Equine Chelamin should be given continually to ensure the presence of minerals in the diet.

INGREDIENTS: Dried Seaweed Meal, Algae Meal, Diatomaceous Earth.

EO003 - 6 lb. Pail (Ship Wt. 7 lbs.) \$31.99

EO030 - 30 lb. Pail (Ship Wt. 31 lbs.) \$136.99

E-Biotic™

E-Biotic ensures the presence of important nutrients commonly lacking in some rations.

E-Biotic is a concentrated, natural food source of active enzymes, probiotic cultures, amino acids, vitamins, minerals, fatty acids, and various other micronutrients. This rich formulation is particularly beneficial to horses primarily on the standard “hay and oats” diet, and to those under stress: gestating, lactating, undergoing rapid growth or debilitated from enteric, metabolic, infectious,

or nutritional disease. E-Biotic not only supplies a wide range of micronutrients, but also increases the horse's ability to extract maximum nutrition from their normal ration.

INGREDIENTS: Yeast Cultures, Aspergillus oryzae Fermentation Product, Bacillus subtilis Fermentation Product, Ground Whole Sesame Seeds, Lecithin, Dried Kelp, Dried Ground Whole Carrots, Dried Wheat Grass Powder, Dried Barley Grass Powder, Spirulina, Bee Pollen, Natural Extractives of Sage, Natural Extractives of Rosemary, Natural Apple Flavor, Dried Enterococcus faecium Fermentation Product, Dried Lactobacillus acidophilus Fermentation Product, Dried Lactobacillus casei Fermentation Product, Dried Lactobacillus plantarum Fermentation Product, Magnesium Proteinate, Niacin, Ferrous Carbonate, Choline Chloride, Potassium Amino Acid Complex, Calcium Pantothenate, Manganese Proteinate, Zinc Proteinate, Thiamine, Riboflavin Supplement, Iron Proteinate, Vitamin A Acetate, Vitamin D₃ Supplement, Vitamin E Supplement, Copper Proteinate, Pyridoxine Hydrochloride, Folic Acid, Biotin, Cobalt Carbonate, Vitamin B₁₂ Supplement, Cobalt Proteinate.

EO001 - 23 oz. Bottle (Ship Wt. 2 lbs.) \$20.99

EO002 - 25 lb. Pail (Ship Wt. 26 lbs.) \$278.49

Equine Biogel™

Equine Biogel – viable (live) naturally occurring microorganisms.

These organisms provide a healthy population of friendly bacteria, which colonize in the digestive tract and add many benefits to the horse's health including modulation of the immune system.

May be used routinely during weaning, diet change, receiving, worming, sickness, and before and after antibiotic therapy. A benefit of this product is to help correct and prevent the unfavorable effects associated with the above procedures.

INGREDIENTS: Cold Pressed High Oleic Safflower Oil, Dried Whey Product, Silicon Dioxide, Cold Pressed Flax Seed Oil, Dried Enterococcus faecium Fermentation Product, Dried Lactobacillus acidophilus Fermentation Product, Dried Lactobacillus casei Fermentation Product, Dried Lactobacillus lactis Fermentation Product, Dried Aspergillus oryzae Fermentation Product, Dried Bacillus subtilis Fermentation Product, Vitamin E Supplement, Natural Extractives of Sage, Natural Extractives of Rosemary.

EO004 - 30cc Oral Syringe (Ship Wt. 0.5 lb.) \$17.99

WYSONG

Equine Diet™ Optimal Forage™ & Supplements

The horse is perhaps unequaled among all creatures in its sheer elegance and beauty. It has that mysterious "something" which no one can quite describe, yet that is the very quality that makes keeping a horse so exciting and pleasurable. Most horse owners are passionate about their horses, and regard their care-taking responsibilities seriously. But as mysterious as the horse itself is, beliefs and opinions about horse care are perhaps even more so.

A critical element influencing health, over which owners have control, is nutrition. Since nutrition is the most crucial element of overall robust health, foods must be selected which are truly wholesome, have not been harmed excessively by processing, and which can be efficiently utilized by the horse. Wysong equine products are not designed just to maintain horses, but rather to enhance and optimize their nutrition and health. Wysong equine diets and supplements were developed by veterinarians, nutritional experts and processing engineers to be uncompromised products based on the number one Wysong priority – health.

Wysong Equine Diet™

Extruded Professional Equine Diet nuggets to be fed with legume pasture/hay. An excellent ration for foals, mares, breeding stock, and as a maintenance and supplemental ration for all horses.

Features:

- 🐾 Includes high quality natural proteins with a complete spectrum of amino acids for muscle mass, immunologic response and metabolic needs.
- 🐾 Calcium, phosphorus, and other major and trace minerals, plus vitamins at optimum levels and correct balances for strong teeth, bones and improved mineral-dependent physiological processes.

- 🐾 Includes blood nutrients such as copper, vitamin B₁₂, folic acid, cobalt, and EFAs to build performance levels, stamina and recuperative powers.
- 🐾 During processing, soy oil cells are ruptured to release a variety of fatty acids including omega-3, -6, and -9, vitamin E and other tocopherols, and lecithin, which increase the health of coat, skin and hooves, as well as naturally preserving the product.
- 🐾 Unique processing improves the availability of immune-enhancing, sulfur-containing amino acids, minerals, and B-vitamins from the ingredients themselves.
- 🐾 Rather than using inexpensive, nutritionally weak ingredients, and attempting to make up for it by simply adding synthetic additives, the richest ingredients are chosen specifically for their nutrient content – not price.
- 🐾 Naturally complexed vitamins are supplemented through nutrient-dense foods which increase vitamin absorption and retention many fold over USP synthetics.
- 🐾 The blending of a variety of ingredients ensures more nutrients than just feeding weak pastures, hays, and grains from depleted soils and supplementing haphazardly with synthetic vitamin/mineral additives of questionable safety.
- 🐾 Natural antioxidants are used as opposed to adding synthetic preservatives of questionable safety.
- 🐾 HTST processing in an oxygen-free, nutrient-protecting atmosphere breaks secondary protein bonds and opens starch molecules, increasing utilization by 20% or more.
- 🐾 Antinutritional factors, including enzyme inhibitors, are inactivated through processing.
- 🐾 Bulk density of fibrous materials is increased permitting greater breakdown by enteric flora.
- 🐾 Dust, fines and foreign matter common to grains are minimized.
- 🐾 Highly digestible carbohydrates generate extra levels of propionic acid, a high-energy volatile fatty acid.
- 🐾 Chelated minerals, (minerals complexed with proteins and carbohydrates), are the important form minerals take in natural plant materials. Increased absorption and utilization of minerals over chemicalized salts is the result.
- 🐾 Probiotic cultures help maintain a beneficial enteric flora. A special microencapsulation ensures viability of these cultures.

- 🐾 Whole natural ingredients are used, not by-products such as brans, middlings, grits, etc.
- 🐾 Working horses are often incapable of consuming the quantity of raw grains and roughage necessary to sustain their activity and replenish losses. The easily digested and concentrated energy in Wysong Equine provides the levels of nutrients necessary for high-energy demands.
- 🐾 The incredible demands of growing foals are met with Wysong Equine. With over 80% of growth occurring in the first 12 months of life, growth that can't be regained once lost, this is the time to feed a product of exceptional nutritional value.
- 🐾 The crunchy nature of the products is enjoyable for the horses to chew and helps keep gums healthy and teeth clean.
- 🐾 Unlike pelleted (compressed) foods and heavy doses of grain which are difficult to digest and can contribute to colic and other digestive disturbances, Wysong Equine literally falls apart in the stomach, making it immediately available for digestion and assimilation of nutrients.

INGREDIENTS: Ground Oats, Ground Corn, Ground Barley, Ground Wheat, Ground Extruded Whole Soybeans, Cane Molasses, Ground Flax Seeds, Salt, Yeast Culture, Soybean Oil, Dried Kelp, Dried Bacillus subtilis Fermentation Product, Dried Aspergillus oryzae Fermentation Product, Dicalcium Phosphate, Magnesium Protein, Niacin Supplement, Ferrous Carbonate, Choline Chloride, Potassium Amino Acid Protein, Dried Lactobacillus acidophilus Fermentation Product, Dried Lactobacillus lactis Fermentation Product, Dried Enterococcus faecium Fermentation Product.

Guaranteed Analysis: Crude Protein - 14.0% min., Crude Fat - 6.0% min., Crude Fiber - 6.0% min., Calcium - 0.3% min./0.7% max., Phosphorus - 0.3% min., Copper - 25 ppm min., Selenium - 0.3 ppm min., Zinc - 78 ppm min., Vitamin A - 3500 IU/lb min., Moisture - 10.0% max., Ash - 5.0% max., Added minerals - 4.0% max.

WDEQ5 - 50 lb. Bag (Ship Wt. 51 lbs.) \$24.49

Optimal Forage™

A perfect blend of forages, hullless oats, molasses, essential fatty acids, and Wysong extruded diet providing high quality protein and digestible energy all in one. Provides Omega-3, -6, -9 fatty acids, vitamin E and other tocopherols, and lecithin to greatly improve coat, skin and hoof health. Exceptionally palatable timothy, alfalfa and oat forages. Hard pressed in poly-wrapped 40# bales for easy feeding, stability, handling, and storage.

INGREDIENTS: Dehydrated Chopped Immature Alfalfa, Dehydrated Chopped Immature Timothy, Dehydrated Chopped Oat Forage, Shredded Beet Pulp, Soy Oil, Molasses, Whole Hullless Oats, and Wysong Extruded Professional Equine Diet Nuggets.

Guaranteed Analysis: Crude protein - 9% min., Crude fat - 10% min., Crude fiber - 22% max., Calcium - 0.5% min./0.7% max., Phosphorus - 0.3% min.

WDOF40 - 40 lb. bale (Ship. Wt. 41 lbs.) \$19.99

Equine E.F.A.™

An essential fatty acid supplement containing naturally stabilized, cold-processed Omega-3, -6, and -9 fatty acids. Benefits of supplementation include healthy and shiny hair coat, healthy skin and modulation of the immune system to enhance overall health and disease resistance.

Essential fatty acids are extremely fragile once extracted from their natural source. Light, heat, and air are all enemies of these fragile nutrients. Thus, Wysong Equine E.F.A. is carefully prepared through gentle, cold-processing methods and then packaged in light-impermeable, nitrogen-flushed (oxygen excluded) bottles. Additionally, a special Wysong antioxidant made from herbs and vitamin E epimers helps stabilize the fatty acids against oxidation (see Dr. Wysong's book, *Lipid Nutrition: Understanding Fats and Oils in Health and Disease*, for further important information on the critical loss of nutrients).

INGREDIENTS: Cold Pressed Soybean Oil, Cold Pressed Flax Seed Oil, Pumpkin Seed Oil, High Oleic Safflower Oil, Rice Bran Oil, Wysong Oxherphol™ (A Natural Antioxidant Consisting of Vitamin E Tocopherol Epimers and Natural Botanical Oleoresins.)

EO007 - 32 oz. Bottle (Ship Wt. 3 lbs.) \$25.49

EO008 - Pump Dispenser Top (Ship Wt. 0.5 lb) \$2.99
