

The Thinking Person's Ferret Food

FERRET ARCHETYPAL™

Using Nature as a Principle...

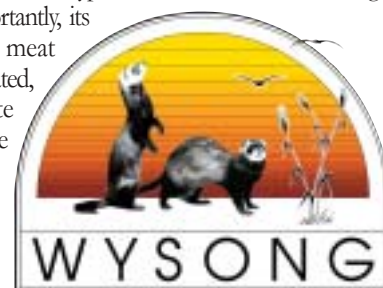

W here at Wysong take your trust seriously. Over two decades of research have been dedicated to creating products with health as the utmost priority. Wysong products are conceived by common sense, grounded in science, developed through logic, proven with results.

Here's what's special about Ferret Archetypal-1™ ...

W ysong Diets seek to emulate the food animals eat in the wild – the diet for which they are genetically programmed. Ferret Archetypal-1™ (are • kah • type – meaning “the original model, the way things are meant to be”) more closely achieves this goal than any other food yet developed. Here's how:

- First and foremost, Ferret Archetypal-1 is not heated in any stage of production. Heat is the enemy of nutrition, destroying nutrients and creating toxins.
- Ferret Archetypal-1 meets the nutritional needs of ferrets for a food rich in concentrated fats as the main source of energy and quality, meat-based protein.
- Ferret Archetypal-1 is ALIVE like all real foods in nature. It is rich in enzymes and probiotic cultures, and has intact the synergistic complexity of life itself.
- Ferret Archetypal-1 is complete with meat, organs, bones, plant nutrients, collagen, proteoglycans (chondroitin, glucosamine), vitamins and chelated minerals.
- Ferret Archetypal-1 is rich in proteins (50%) including amino acids such as taurine, arginine and L-carnitine commonly degraded or lost in heat-processed food.
- Ferret Archetypal-1 contains health- and immune-enhancing fatty acids including omega-3s, which are stabilized with Wysong natural Oxherphol™ antioxidant.
- Ferret Archetypal-1 contains no grains and thus does not contribute to carbohydrate glut diseases of the ferret such as urolithiasis, poor coat and skin quality and pancreatic disorders.
- Ferret Archetypal-1 is free of non-nutritional additives used by manufacturers to create color, texture, taste, stool consistency and shelf-life.
- Ferret Archetypal-1 is naturally preserved with Wysong Oxherphol™ antioxidant, Nutri-Pak™ oxygen- and light-barrier packaging, and fats and oils purged of oxygen by special processing.
- Ferret Archetypal-1's value cannot be measured on a cost-per-pound basis. First, if rehydrated, Ferret Archetypal-1 creates several times its weight in natural food. More importantly, its extreme concentration of meat protein and fresh, unadulterated, “living” nutrients promote optimal health, the ultimate measure of a food's value.

–Wysong works!

Wysong Diets are uniquely formulated and processed – to achieve optimal nutrition. This new rational approach to feeding seeks to mimic archetypal genetic patterns and puts health as the number one priority. This is far superior to the industry standard approach of analytical values or feeding trials on laboratory animals, which targets minimal nutrition and has been proven in scientific studies to risk disease* in spite of “100% complete and balanced” claims.

Be a thinking person. Learn how to help your pet be the best it can be by moving beyond marketing claims of “completeness” to an informed place of feeding for health. To maximize your feeding success, follow the Wysong Optimal Health Program™*. Rotate among Wysong Diets and supplement with fresh foods, Wysong probiotics, enzymes and fatty acids. Do not feed processed foods exclusively, regardless of seductive claims of testing or completeness.

CRUDE PROTEIN	MIN.	50.0%
CRUDE FAT	MIN.	28.0%
CRUDE FIBER	MAX.	2.8%
MOISTURE	MAX.	3.0%

FEEDING GUIDE

GENERAL INSTRUCTIONS:

Use Ferret Archetypal-1™ as a singular food for a meal, as well as a supplement or treat. Offer the larger chunks as treats, crumble them over regular meals, or reconstitute with water as described below.

Variety is the spice of health. Use Ferret Archetypal-1 in combination with or as an alternative to Wysong Ferret Archetypal-2™ dry, Archetype Burgers™, All Meats™ canned, and fresh foods.

Gradually introduce this highly concentrated food to avoid digestive upset.

Always keep fresh, pure water available (life-enhanced with Wysong Wellspring™ water rejuvenator) and offer plenty of fresh air, sunshine, exercise and big doses of your tender loving care.

DIRECTIONS:

Ferrets should have fresh food and water available at all times.

Ferret Archetypal-1 may be fed dry or soaked with water at the ratio of 1/4 cup Ferret Archetypal-1 with 1/5 cup of water. Let soak for 10-15 minutes, or until rehydrated. Following rehydration excess food should be refrigerated for the next feeding or discarded. Freshen food offered in dry form every 24 hours.

FEEDING

The Wysong Philosophy: *Wysong Corporation's goal is to create products and educational aids to enhance the health of humans, animals, and the environment.*

Wysong Diets have emerged from this commitment and are part of an advanced Optimal Health Program scientifically developed by Wysong and refined since 1979.
