

Wysong Natural Deodorant Stone™ is made from natural mineral salts, highly effective in preventing the growth of odor causing bacteria. The minerals are of large molecular size and are not absorbed by the skin. An excellent healthy alternative to aluminum chlorohydrate (absorbable), chemical dyes, preservatives, perfumes and emulsifiers, which plug pores, stain clothes and may be absorbed directly into the skin.

Contains No Aluminum Chlorohydrate
Biodegradable ~ No Animal Testing

Directions: Moisten, then generously apply to skin area. Use as an underarm, foot and body deodorant. May also be used to retard bacterial growth in skin infections and acne. Repeat as necessary through the day.

Ingredients: Calcium, Magnesium, Manganese, Phosphorus, Silicon, Sodium, Ammonium, Potassium, Alum, Strontium, Titanium.
