

EQUINE E.F.A.™

An essential fatty acid supplement for horses that contains naturally stabilized, cold pressed omega-3, 6, and 9 fatty acids.

CONTAINS NO ARTIFICIAL OR SYNTHETIC INGREDIENTS

Caution: Essential fatty acids can be destroyed by heat, light, and oxygen. Keep bottle closed and in a cool, dark place.

INGREDIENTS: Cold Pressed Soybean Oil, Cold Pressed Flax Seed Oil, Pumpkin Seed Oil, High Oleic Safflower Oil, Rice Bran Oil, Wysong Oxherphol™ (A Natural Antioxidant Consisting of Vitamin E Tocopherol Epimers, Fat-Soluble Vitamin C, Organic Chelators, and Natural Botanical Oleoresins).

One Tablespoon Contains:

Stearidonic Acid	0.017 g (Ω 3)
Palmitic Acid	1.361 g (s.f.a.)
Stearic Acid	0.553 g (s.f.a.)
Oleic Acid	3.884 g (Ω 9)
Linoleic Acid	6.308 g (Ω 6)
Linolenic Acid	1.786 g (Ω 3)
GLA (gamma linoleic acid) ...	0.075 g (Ω 6)

32 fl. oz. (946 ml)

Wysong Equine E.F.A. provides a highly active, concentrated source of essential fatty acids for dietary supplementation. This unique blend of natural seed oils provides a combination of omega-3, -6, and -9 fatty acids known to exert a broad range of beneficial structural and metabolic effects.

Essential fatty acids are extremely fragile once extracted from their natural source. Light, heat, and air are all enemies of these fragile nutrients. Thus, Wysong Equine E.F.A. is carefully prepared through gentle, cold processing methods, stabilized against oxidation with Wysong Oxherphol™ antioxidant made from tocopherol epimers of vitamin E, fat-soluble vitamin C, and botanical oleoresins, and then packaged in light-impervious, nitrogen-flushed (oxygen excluded) bottles.

Essential fatty acids, like essential vitamins and minerals, must be consumed regularly in their unaltered state for healthful benefits to result. Animal feeds that have been stored and/or processed using heat, mechanical forces, distillation, solvent extractions, and so forth, can lose essential nutrients or have them altered or destroyed.

In addition to Equine E.F.A., other feedstuffs, including organically grown fresh forage, grains, and Wysong extruded Equine Diet™, provide excellent sources of nutrients including essential fatty acids.

Directions: Administer one Tablespoon per 1,000 lbs. of animal's body weight daily. (Note: 1 tablespoon = 2 pumps.) Mix with the grain portion of ration or with Wysong Equine Diet™.

Wysong Equine E.F.A. is meant to complement a regimen of fresh natural foods, daily fresh air and sun, pure water, exercise, and weight control.
