FEEDING GUIDE

GENERAL INSTRUCTIONS: When used as part of the Wysong Optimal Health Program[™], Nurture emulates the food animals eat in the wild – the diet they are genetically programmed for.

Introduce gradually. Do not overfeed, regardless of the pet's eagerness. To augment and provide occasional variety to the diet: lightly heat, add water, sprinkle with Wysong AddLife[™] or DentaTreat[™], offer Wysong Biscuits[™] or Cat Treats[™], or mix with Wysong canned diets, Archetype[™], and fresh whole foods.

Always keep fresh, pure water available (enhanced with Wysong WellSpring[™] water rejuvenator) and offer plenty of fresh air, sunshine, exercise, and big doses of your tender loving care.

If fed singularly on any given day, the following general instructions apply. (Puppies and kittens should always be fed free choice.)

Weight of Dog	10 Lbs.	20 Lbs.	40 Lbs.	60 Lbs.	80 Lbs.
Amount of Daily Feeding	1/2 cup	1-1/4 cup	2-1/4 cup	3-1/4 cup	4-1/4 cup
Weight of Cat	5 Lbs.	10 Lbs.	15 Lbs.	20 Lbs.	
Amount of Daily Feeding	1/4 cup	1/2 cup	3/4 cup	1 cup	

Handling Guidelines for Safe Use

Some raw food products may contain bacteria that could cause illness to you or the animals you are feeding if mishandled. For your protection, follow these instructions for safest use:

1. Keep raw meat and poultry separate from other foods.
2. Wash working surfaces, utensils (including preparation and feeding bowls), hands, and any other items that touch or contact raw meat or poultry with hot soapy water.
3. Refrigerate leftovers immediately or discard.

Wysong offers intelligent products and educational aids to enhance the health of humans, animals, and the environment.

Wysong Diets[™] for pets have emerged from this commitment and are part of an advanced Optimal Health Program[™] scientifically developed by Dr. Wysong and his team of professionals, and refined since 1979.

Please visit our website or request literature to learn more about our extensive range of products and the unique health-first philosophy from which they emerge.

Nurture with Free-Range Pheasant[™] will likely be the most palatable commercial food you would have ever tried. Here's why:

- Pets are genetically designed for, and love most, the natural foods they will find in the wild.
- Nurture is a unique food developed over many years by the scientists at Wysong to help achieve this ideal food goal.
- The chicken used in the kibble is fresh.
- The shredded morsels of pheasant retain all the merits of raw natural food with Wysong's special True Non-Thermal (TNT)[™] cold-processing.
- The pheasant ingredient is never heated above 118° F, the critical temperature above which food enzymes are destroyed.
- Nurture contains all the other merits of Wysong foods that have been so successful with thousands of pets over the past 25 years, including prebiotics, probiotics, antioxidants, phytonutrients, essential fatty acids (including omega-3's), natural vitamins, minerals and accessory nutrients.
- No non-nutritional or artificial anything.
- Nurture is designed to achieve optimal nutrition, not just meet minimal regulatory standards.
- Most importantly – **Wysong Works!**
